|-------------------------|-----------------------------------------|
| <b>Course Code:</b>     | <b>CSE111</b>                           |
| <b>Course Title:</b>    | <b>Programming Language II</b>          |
| <b>Topic:</b>           | <b>Multi-class Design</b>               |
| <b>Number of Tasks:</b> | <b>10 (Classwork: 05, Homework: 05)</b> |

[You are not allowed to change the driver codes of any of the tasks]

## CLASSWORK

After YouTube Music, Spotify has decided to redesign their Playlist system. However, they decided to **not use arrays** to store their music, instead, they will use OOP concepts to create the new Playlist system. You have been assigned to build the system by using 3 classes (**Song**, **Playlist**, and **SpotifyTester**).

Each song will have the *name of the song*, *artist name*, *length of the song in minutes* and the *next song*. Each playlist will have a *name* and the *first song*. Playlists can contain multiple songs. Both classes will have some features which will be demonstrated in each task.

[You are not allowed to use Array or any built-in libraries for this assignment]

### Task 1

Design the **Song** class with *constructor* and *songInfo()* method along with necessary attributes in such a way that it produces the following output.

| Driver Code                                                                                                                                                                                                                                                                                                   | Output                                                                     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| <pre>public class SpotifyTester {     public static void main(String[] args) {         Song s1 = new Song("Song-A", "Artist-A", 3);         System.out.println("1=====");         s1.songInfo();         System.out.println("2=====");         // More lines will be added in this Tester class     } }</pre> | <pre>1===== Title: Song-A, Artist: Artist-A Length: 3 minutes 2=====</pre> |

### Task 2

Design the **Playlist** class *constructor* along with necessary attributes in such a way that it produces the following output.

| Driver Code                                                                                                                                      | Output                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------|
| <pre>System.out.println("2====="); // Continuation from Task 1 Playlist p1 = new Playlist("First Playlist"); System.out.println("3=====");</pre> | <pre>2===== First Playlist created. 3=====</pre> |

### Task 3

Create *info()* method inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                                                                                                                                                                                                           | Output                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <pre>System.out.println("3====="); // Continuation from Task 2 p1.info(); System.out.println("4====="); p1.start = s1; p1.info(); System.out.println("5====="); Song s2 = new Song("Song-B", "Artist-B", 4); Song s3 = new Song("Song-C", "Artist-C", 2); p1.start.next = s2; p1.start.next.next = s3; p1.info(); System.out.println("6=====");</pre> | <pre>3===== First Playlist has the following songs: No songs in First Playlist. 4===== First Playlist has the following songs: Song-1 Title: Song-A, Artist: Artist-A Length: 3 minutes 5===== First Playlist has the following songs: Song-1 Title: Song-A, Artist: Artist-A Length: 3 minutes Song-2 Title: Song-B, Artist: Artist-B Length: 4 minutes Song-3 Title: Song-C, Artist: Artist-C Length: 2 minutes 6=====</pre> |

## Task 4

Create *addSong()* method inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                                                                                                                       | Output                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <pre>System.out.println("6====="); // Continuation from Task 3 Song s4 = new Song("Song-D","Artist-D",3); Song s5 = new Song("Song-E","Artist-E",4); p1.addSong(s4); p1.addSong(s5); System.out.println("7====="); p1.info(); System.out.println("8=====");</pre> | <pre>6===== Song-D added to First Playlist. Song-E added to First Playlist. 7===== First Playlist has the following songs: Song-1 Title: Song-A, Artist: Artist-A Length: 3 minutes Song-2 Title: Song-B, Artist: Artist-B Length: 4 minutes Song-3 Title: Song-C, Artist: Artist-C Length: 2 minutes Song-4 Title: Song-D, Artist: Artist-D Length: 3 minutes Song-5 Title: Song-E, Artist: Artist-E Length: 4 minutes 8=====</pre> |

## Task 5

Create *addSong()* [overloaded] method inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                                                                                                                                                                                                                                                                                 | Output                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <pre>System.out.println("8====="); // Continuation from Task 4 Song s6 = new Song("Song-F", "Artist-F", 2); Song s7 = new Song("Song-G", "Artist-G", 2); Song s8 = new Song("Song-H", "Artist-H", 4); Song s9 = new Song("Song-I", "Artist-I", 3); p1.addSong(s6, false); p1.addSong(s7, true); p1.addSong(s8, false); p1.addSong(s9, false); System.out.println("9====="); p1.info(); System.out.println("10=====");</pre> | <pre>8===== Song-F added to First Playlist. Song-G added to First Playlist. Song-H added to First Playlist. Song-I added to First Playlist. 9===== First Playlist has the following songs: Song-1 Title: Song-G, Artist: Artist-G Length: 2 minutes Song-2 Title: Song-A, Artist: Artist-A Length: 3 minutes Song-3 Title: Song-B, Artist: Artist-B Length: 4 minutes Song-4 Title: Song-C, Artist: Artist-C Length: 2 minutes Song-5 Title: Song-D, Artist: Artist-D Length: 3 minutes Song-6 Title: Song-E, Artist: Artist-E Length: 4 minutes Song-7 Title: Song-F, Artist: Artist-F Length: 2 minutes Song-8 Title: Song-H, Artist: Artist-H Length: 4 minutes Song-9 Title: Song-I, Artist: Artist-I Length: 3 minutes 10=====</pre> |

## **HOMEWORK**

### **Task 6**

Create *playSong()* method inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                                                   | Output                                                                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <pre>System.out.println("10=====");<br/>// Continuation from Task 5<br/>p1.playSong("Song-F");<br/>p1.playSong("Song-Z");<br/>p1.playSong("Song-B");<br/>System.out.println("11=====");</pre> | <pre>10=====<br/>Playing Song-F by Artist-F.<br/>Song-Z not found in First Playlist.<br/>Playing Song-B by Artist-B.<br/>11=====</pre> |

### **Task 7**

Create the *playSong()* [overloaded] method inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                               | Output                                                                                                                                               |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| <pre>System.out.println("11=====");<br/>// Continuation from Task 6<br/>p1.playSong(0);<br/>p1.playSong(4);<br/>p1.playSong(10);<br/>System.out.println("12=====");</pre> | <pre>11=====<br/>Playing Song-G by Artist-G.<br/>Playing Song-D by Artist-D.<br/>Song at Index 10 not found in First<br/>Playlist.<br/>12=====</pre> |

## Task 8

Create the *deleteSong()* method and its overloaded version inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                                                     | Output                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <pre>System.out.println("12====="); p1.deleteSong(); p1.deleteSong(); p1.deleteSong(false); p1.deleteSong(true); System.out.println("13====="); p1.info(); System.out.println("14=====");</pre> | <pre>12===== Song-I deleted from First Playlist Song-H deleted from First Playlist Song-F deleted from First Playlist First Song Deleted! 13===== First Playlist has the following songs: Song-1 Title: Song-A, Artist: Artist-A Length: 3 minutes Song-2 Title: Song-B, Artist: Artist-B Length: 4 minutes Song-3 Title: Song-C, Artist: Artist-C Length: 2 minutes Song-4 Title: Song-D, Artist: Artist-D Length: 3 minutes Song-5 Title: Song-E, Artist: Artist-E Length: 4 minutes 14=====</pre> |

## Task 9

Create the *totalSong()* method inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                          | Output                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| <pre>System.out.println("14====="); // Continuation from Task 8 System.out.println(p1.name + " has "+p1.totalSong() +" songs"); System.out.println("15=====");</pre> | <pre>14===== First Playlist has 5 songs 15=====</pre> |

## Task 10

Create the *merge()* method inside the **Playlist** class to produce the following output.

| Driver Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Output                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Ungraded Tasks (Optional)

(You don't have to submit the ungraded tasks)

### Task 11

Create the *showHistory()* method inside the **Playlist** class to produce the following output.  
[Hint: *showHistory()* only shows the songs which were played from the playlist. So you might need to update the method which is used to play Songs.]

| Driver Code                                                                                                                                                                | Output                                                                                                                                                                                                                                                                                                                                |
